N800 Traction Platform Lift

Focus On Home Elevators

Multiple Security Mechanisms

Magnetic Leveling Device

German ELGO magnetic scale-absolute position shaft measurement system LIMAX2M is equivalent to a combination of speed limiter + photoelectric switch + end station switch, with a control accuracy of 0.1mm.

It requires very little installation space, and dust, dirt and even black smoke will not affect the effect.

Even under humid and high temperature conditions, the system can operate stably and has the advantages of long service life and maintenance-free.
